March 6, 2019

Contents

I	Appendix	2
1	Glossary	3
2	Paper notes	4
3	Annotated Bibliography	5
4	Index	6

Part I

Appendix

Chapter 1

Glossary

Say you found a useful definition, put it in a glossary of terms for future referral [1]

Chapter 2

Paper notes

I write down notes when I work through a paper. If I work through a derivation, or fill in the steps of proof, I put it in a section about the paper. [1]

Chapter 3

Annotated Bibliography

This is something everyone should get in the habit of doing. Summarize the paper so you can quickly recall what it is about. [1]

Chapter 4

Index

Say you were working with a very specific molecule several months apart, it would be nice to know on what days (or at least pages) you discuss this. While you will have a searchable document, it still sucks to try to search for chemical equations, or for non-ASCII characters. [1]
